梅植の実を食べるヒヨドリ

A photograph of a bird, likely a species of sparrow or finch, perched on a branch of a bush. The bird has greyish-brown upperparts and a lighter, speckled underbelly. It is facing left, with its beak open and holding a single bright red berry. The surrounding branches are densely covered with many more of these red berries and small green leaves. The background is a soft, out-of-focus mix of green and yellow, suggesting a natural outdoor setting.
